

Draw stairs

8 Kuy

Given a number n , draw stairs using the letter "I", n tall and n wide, with the tallest in the top left.

For example $n = 3$ result in:

```
"I\n I\n  I"
```

or printed:

```
I
 I
  I
```

Another example, a 7-step stairs should be drawn like this:

```
I
 I
  I
   I
    I
     I
      I
```
