

Sum of differences in array

8 Kuy

Your task is to sum the differences between consecutive pairs in the array in descending order.

For example:

```
sumOfDifferences([2, 1, 10])
```

Returns 9

Descending order: [10, 2, 1]

Sum: $(10 - 2) + (2 - 1) = 8 + 1 = 9$

If the array is empty or the array has only one element the result should be 0
